PLANNING TO COMPUTERIZE YOUR PRACTICE?

The ACMED Medical Billing Case plus a computer is all you need to start issuing accounts to your patients. It contains:

° the ACMED User's Manual which explains in clear language how to install and use the System on your computer.

° the ACMED programs stored on floppy disks.

° an initial supply of ACMED account stationary.

The ACMED Medical History System also comes in a case, ready to start recording your patient histories. Using these cases, your computer dealer can sell you a computer and deliver it with the ACMED System already installed and ready to go.

ACMED Billing is already being used by General Practitioners, Anaesthetists, Surgeons and a Psychiatric practice.

ACMED

THE ULTIMATE MEDICAL SOFTWARE SYSTEM

MEDICAL BILLING

The ACMED Medical Billing System offers these features:

GOOD DESIGN

ACMED has been designed by Dr. Adrian Neath, a general practitioner with extensive computer experience, and Mr. Ian Speirs, a computer systems analyst and programmer. They have spent five years developing the ACMED System so that it incorporates all the features needed by Australian medical practices.

EASY INSTALLATION

The case contains all you need to get started. You can be issuing accounts after a few hours familiarisation.

FLEXIBLE

The system suits all types of practices, from solo specialist or general practitioner up to large multi-discipline groups. It will also allow a variety of billing methods.

AN ACCOUNTING WIZARD

ACMED will remove your worries about accounting. It will produce daily reports on charges and income, and weekly reports which summarise how your practice is performing. The system will also automatically remind patients of overdue accounts.

ALL THE USUAL FEATURES

ACMED includes all the usual features found in computerised billing systems:
— Immediate billing (or monthly if preferred).
— Banking slips.
— Bulk-billing forms automatically filled out by computer.
— Multiple operation and anaesthetic calculations.
— Automatic fee calculation for different categories of patients. e.g. Worker's compensation, third party, insurance etc.
— Deferred billing until the end of a course of treatment.
— Practice management reports and summaries.

HISTORY SYSTEM

The ACMED Medical History System offers these features:

FLEXIBILITY

The history is extremely flexible so that you can design your own method of recording the history, from simple notes up to an integrated problem-oriented record. This allows you to dispense with filing cabinets and all the problems of maintaining paper records.

RAPID SEARCH

If you wish to find out which patients are due for vaccinations this month, the computer will rapidly print a list for you and prepare Recall Notices ready for mailing.

ACCURACY

The computer keeps track of each patient's notes and test results and never misplaces them. The notes are always available from the monitor on the desk.

AUTOMATIC FUNCTIONS

The computer will automatically maintain a summary of each patient's history. This summary is updated by reference to the progress notes you make each day.

RESEARCH

To enable easy research on your notes, there is provision to code diagnoses by using any coding system you wish. As well there is provision while entering notes to select a recall date so patients may be recalled automatically for follow-up in a research program.

The ACMED Billing and History System is available on the following computers:

Digital Rainbow 100
IBM Personal Computer
NEC APC III Personal Computer
Discovery Multi-User Computer

These computers are supplied by experienced companies who will provide front-line support with further support provided by ACMED Software. A Software Maintenance Agreement is available for $500 per year which will guarantee the provision of updates for your system and provides phone and on-site support.

Dealers for the ACMED Software System are:
GT MICROCOMPUTER:
SYDNEY   (02) 439 8644
NEWCASTLE   (049) 26 3388
O.A.S. ENGINEERING:
NEWCASTLE   (049) 69 4688
ARCHIVES COMPUTERS:
SYDNEY   (02) 922 3188
MELBOURNE (03) 699 8377
CANBERRA   (062) 47 6555

PRICES

The ACMED System is available as shown, with the case, detailed manual, software discettes and a supply of stationary.

Demonstration packs are the same, but have limited file sizes. The price will be credited to your purchase of a full ACMED System.

Recommended Retail Prices are:

	Full System	Demo Case
ACMED Billing	$2000	$150
ACMED History	$2000	$150
ACMED Billing & History	$3000	$200

All you need to do is contact a computer dealer; he can arrange a demonstration of the package and then install the system for you.
